THE OFFICIAL BASEBALL GLOVE, GAME BALL, BASE SUPPLIER, HELMET AND FACE GUARD OF
MAJOR LEAGUE BASEBALL®

**REV1X® SERIES**

Rawlings® continues to revolutionize the glove game with its latest additions to the REV1X® series. These gloves feature a sublimated polyester back design encapsulated in molded TPU yielding an unrivaled cosmetic look with ultimate durability. The lace-less web, palm and heel provide a smooth fielding surface that allows for an easier ball transfer from glove to hand. Additionally, REV1X® gloves are constructed with molded pinky and thumb pads which add stiffness to the fingertips that's maintained throughout the glove's life cycle.

To ensure an optimal fit compared to traditional models, REV1X® gloves utilize an innovative adaptive wrist technology to accommodate a wide range of wrist sizes.

**HEART OF THE HIDE® TRADITIONAL SERIES**

For more than 65 years, Rawlings® Heart of the Hide® gloves have been a staple for many of baseball's most well-known pros, and that tradition continues today. Our Heart of the Hide® traditional gloves feature all the same premium materials you expect in a pro model glove – high quality US steerhide leather that forms to the perfect shape and pocket, deer tanned cowhide palm lining and soft full-grain finger back linings for ultimate comfort and pro grade leather laces for durability and strength. Marked by established pro patterns and classic color ways, these gloves pay homage to the rich history of Rawlings® gloves while incorporating the latest technology and performance attributes – the best of both worlds.

**FLEX PALM™ SERIES**

The all-new Rawlings® Flex Palm™ series was created specifically for youth athletes in terms of fit and feel. Strategically placed TPU modular pieces in the palm enable an easy close and added hand protection when catching the ball. Additionally, a newly designed wrist opening better accommodates smaller hands and wrist sizes for an optimal fit.

**SIERRA ROMERO**

My goal with this glove was to pay tribute to my dad who passed away earlier this year. Not only was he an amazing man in the softball community, but he was such an amazing father to all of us. This glove represents family, peace and unconditional love.

He always said we were a "product of hard work" growing up and that is something that has always stuck with me. Everything in life requires hard work because nothing is ever just handed to anyone. We took those qualities he taught us at a young age and used them in our everyday life growing up.

Since my father's passing, a sense of peace for me has been to look at the sky and see the sun beaming through the clouds which brings me a tremendous sense of love and comfort. That is where the sun stamp in the palm comes from, and the metallic color is the brightness of the sun through the clouds.

The style and material of the glove is meant to be durable but lightweight making it easy to clean but also perform at the highest level. The lightweight aspect was something I wanted to make glove positioning on defense quick and effortless.

And to make it even better, we have made adjustments to make the break-in process much easier and quicker because I know how important it is to players and parents so that their glove is ready to use as soon as possible.

Introducing a completely new generation of composite performance with the uniquely designed 2X Double Barrel. First of its kind and innovative Double Barrel Construction offers USSSA players what they want the most, maximum performance. It's unique barrel construction combines a thinner, lower compression outer barrel to create more barrel flex across the length of the entire barrel; with an inner barrel to govern performance directly at the USSSA allowed limit.

- **2X Double Barrel Construction:** Easton's patented double barrel technology combines a lower compression outer barrel with a lightweight and durable inner barrel. The outer barrel provides more barrel flex across the length of the entire hitting surface and the inner barrel governs performance directly at the performance limit. This revolutionary technology results in the lowest barrel compression of any USSSA bat, with more barrel flex and a higher performance across the length of the entire barrel.
- **Swing Weight:** Power balanced design engineered to deliver maximum performance with optimal swing speed
- **ConneXion Max®:** Utilizes an elastomer connector to interlock the handle to the barrel, eliminating vibration for optimal feel
- **Opti-Flex Handle:** Driven by ongoing research and feedback from some of the game's best players, each bat size's handle flex is specifically engineered to the elite travel ball athlete
- **Power Boost Soft Knob:** Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand
- **Flow+Tack™ Grip:** Comfortable and tacky grip for best feel and control

- **3D Ropecoil Composite:** Easton's patented 3-dimensional composite rope is wrapped 360 degrees, vertically, around the center of the barrel at the sweet spot. Surrounded by optimized thickness composite sections toward the end cap and taper to maximize performance outside of the sweet spot, creating the widest max performance area across the entire barrel. This unique design governs performance set directly at the performance limit.
- **Swing Weight:** Light swing weight feel with a low MOI, produces more bat speed and barrel control
- **ConneXion Max®:** Utilizes an elastomer connector to interlock the handle to the barrel, eliminating vibration for optimal feel
- **Opti-Flex Handle:** Driven by ongoing research and feedback from some of the game's best players, each bat size's handle flex is specifically engineered to the elite USA Baseball athlete
- **Power Boost Soft Knob:** Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand
- **Flow+Tack™ Grip:** 1.8mm perforated grip for best feel and control
- **Certification:** USA Baseball

R100-UP™

ULTIMATE PRACTICE TECHNOLOGY™

Practice longer with a ball that's strong enough to keep up with you. The Rawlings® Ultimate Practice Baseball™ is designed to have a game-like feel, but last through hit after hit after hit—no matter the field conditions.

ADDED LIFESPAN

3X more durable than a traditional baseball.

WEATHER RESISTANT

Molded cover minimizes weight gain due to moisture.

EASIER TO CLEAN

Hard non-porous surface makes it much easier to clean than a traditional sewn baseball

Balls tested at 100 miles per hour against a steel plate for 400 impacts. Compression measured after every 80 impacts. Compression refers to the pounds of force (lbs) necessary to compress the ball 1/4 inch.

RED DOT® 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs: that is why the best players in the nation choose Rawlings® softballs. The inner core uses Rawlings' proprietary dense cell formulation, creating a ball worthy of being the Official Championship Softball of the NCAA® and NAIA®. With the addition of the C-LOK™ adhesive and moisture barrier, the improved pro-leather cover with just the right amount of tack, there is no wonder why Rawlings has a rich tradition in fastpitch softball.

Balls without Rawlings® C-LOK™ and poly-core combination can absorb moisture and lose compression (get softer).

C-LOK™ plus Rawlings® proprietary dense cell poly-core technology repels moisture and maintains higher compression.

DREAM SEAM® HIGH-DENSITY CORK

For teams wanting the distinctive sound and feel of cork, Rawlings offers a complete line of NFHS®, USA Softball™, USSSA®, NSA® and ISC™ cork game balls. Made of high-density cork and Rawlings® patented Dream Seam® technology, they offer the performance you demand while giving a lower cost option in game balls.

RIF® TRAINING BALLS

Rawlings was the originator of RIF® balls designed to reduce the severity of ball impact injuries. Since the original RIF® game balls, Rawlings has expanded its offering to practice-level soft-training balls. These products are great for outdoor as well as indoor training.

REDUCED INJURY FACTOR™

- Rawlings is the creator of the RIF® softball and all are NOCSAE® approved. All RIF® balls reduce bat denting, especially in cold weather when balls get harder.

BENEFITS

- Reduces bat denting
- Enhances skill development
- Reduces fear of ball impact due to lower compression specifications of the ball
- Can lower team insurance rates
- Does not change the game
