

Athletics Healthspace

RESPONDING TO THE FUTURE OF ATHLETIC ORGANIZATIONS' HEALTH & SAFETY NEEDS

At the U.S. Council for Athletes' Health (USCAH) we believe athletic health and safety education and compliance are a priority. To ensure your organization's athletic health and safety education and compliance requirements are delivered and executed we created Athletics Healthspace.

Athletics Healthspace is an interactive platform that provides your staff, coaches, athletes, and partners access to institutional assessments, educational training, and innovative athletics healthcare solutions.

Our USCAH team is dedicated to collaborating with your athletic organization to ensure your healthcare education programs are as informative and streamlined as possible to enhance accountability standards, and to help you meet compliance criteria with both a regulatory and healthcare-driven lens.

Athletics Healthspace—the innovative health compliance solution for your athletic organization offers:

Comprehensive, independent and unbiased athletic program assessment for healthcare delivery

Pro-active e-learning modules for staff, athletes, and coaches

Stakeholder surveys for real-time feedback

Responding to the future of student-athlete health compliance, Athletics Healthspace incorporates the interassociation guidelines¹ addressing mortality and catastrophic injury in athletes by:

- Prioritizing healthcare delivery to athletes for prevention and response
- Addressing catastrophic injury and death in athletes through education and response

These interassociation guidelines¹ address six critical areas and are:

- Endorsed by 14 major medical organizations
- Adopted by the NCAA Board of Governors as Association-wide policy effective August 1, 2019
- Published in major sports medicine publications with the aim to establish best practices

Online Program Assessments

- Assessment of your program's policies & procedures
- Strengths & weaknesses analysis
- An overall score of your athletic medical program
- Identification of potential risk areas

E-Learning Modules

- Familiar Learning Management System (LMS) format with 30 courses available with ever-growing library which cover many topics, including concussion, sickle cell trait, heat illness, over-training, exertion, rhabdomyolysis, mental health, eating disorders, sexual abuse & assault, bullying & hazing, cardiac emergency and more.
- Instant feedback to student with multiple attempts to pass course
- Institution can customize needs for further training
- Courses developed by experts in the field
- Meets educational compliance components

On-site Consulting

- Comprehensive program review
- Independent incident reviews
- Development of policies and guidelines
- Complete program design
- Education programming
